EDUCATION

Rutgers University

New Brunswick, New Jersey, United States

Bachelor of Science in Finance

Expected Graduate 2029

- **GPA:** 3.82 / 4.0
- **Honors:** Dean's list, National Art Honor Society, AP Scholar with Distinction
- **Relevant Coursework:** Microeconomics and Macroeconomics, Statistics, Calculus II, Financial Accounting

EXPERIENCE

Rutgers Economic Society RECONS Review

New Brunswick, NJ

Staff Writer

Jan 2026 – Present

- Author data-driven macroeconomic and market analysis articles for the official undergraduate economic news platform, translating complex corporate maneuvers into digestible investor commentary.
- Evaluated capital rotation trends within the entertainment sector, analyzing the financial risk profiles of mega-M&A transactions, including Electronic Arts' \$55B leveraged buyout and its \$20B debt package.
- Conducted ongoing research on the Basel III Endgame framework, examining how stricter bank capital reserves accelerate a regulatory migration of corporate debt into the \$1.7T private credit and shadow banking sectors.
- Collaborate with editorial staff to pitch timely economic topics, refine analytical frameworks, and ensure rigorous journalistic standards before publication.

Rutgers The Bender Trust Project Competition

Piscataway, NJ

Fourth Place Winner

Oct 2025– Dec 2025

- Conducted strategic analysis on Lennox International (\$LII), synthesizing insights from 5 years of industry reports and investor presentations to support a "Buy" thesis.
- Evaluated corporate strategy and 2 key segments, translating complex shareholder data into a cohesive narrative regarding supply chain resilience and residential demand.
- Spearheaded the design of a 20-slide final client pitch deck, leveraging visual storytelling techniques to present key risks and opportunities to the judging panel.

IB Environmental Systems & Societies: Internal Assessment

Anaheim, CA

Individual Research

Sep 2024 – May 2025

- Conducted a quantitative analysis of climate and biodiversity datasets (BOM, ABARES, TSX) to evaluate climate change impacts on subtropical ecosystems; findings showed a correlation between rainfall variability and species richness.
- Led independent efforts to collect, clean, and merge multi-source datasets into a single analyzable panel; applied statistical tools (SD, Pearson correlation) to test hypotheses, resulting in clear correlation of climate-species interactions.
- Assessed data limitations (outliers, missing data) and recommended adjustments (restricted to a specific timeframe, alternative data source), with implementation to ensure reliable results and a replicable methodology.
- Developed a strategy for communicating findings in a formal research report; translated statistical outputs into actionable recommendations (biodiversity monitoring, adaptive policy), resulting in a clear and persuasive presentation to academic evaluators.

SKILLS, ACTIVITIES & INTERESTS

Languages: Mandarin (Native), English (Professional)

Technical Skills: Python (Beginner, currently learning), Microsoft Office Suite (Word, PowerPoint, Excel)

Activities: Rutgers Out in Business Secretary, Rutgers Little Investment Bankers, Business and Economic LLC, Rutgers Economic Society, Rutgers 4WARD program, Rutgers Personal Finance Club, O4U summer 2026 mentee

Interests: Luminism, modern, and contemporary art; Vintage and retro fashion ('60s–'90s influences); Botany and environmental design; Futurist and Bauhaus architecture
